11	<i>De-icing</i>	Nil
12	<i>Remarks</i>	Nil

SUMU AD 2.9-4 HANDLING SERVICES AND FACILITIES

1	<i>Cargo-handling facilities</i>	4 pallet loaders / containers of 7000 KG; 2 pallet loaders / containers of 16000 KG; 8 conveyor belts; 110 WB dollies; 1 dolly of 20 FT; 29 roof luggage carts; 22 simple luggage carts; 16 towing tractors.
2	<i>Fuel/oil types</i>	✈ AVGAS 100; JET A-1
3	<i>Fuelling facilities/capacity</i>	✈ JET A-1 - DISA: 4 tanks of 90000 L and 87000 L in movable units (4 units) ✈ JET A-1 - NEXZUR S.A.: 3 tanks of 100000 L each and 56000 L in movable units (2 units) ✈ AVGAS 100 - SINATUS S.A.: 1 filling station of 20000 L.
4	<i>De-icing facilities</i>	Nil
5	<i>Hangar space for visiting aircraft</i>	For availability contact with: (+598) (0)99 673 870 e-mail: fbo@aerpuertosvipclub.com.uy
6	<i>Repair facilities for visiting aircraft</i>	Nil
7	<i>Remarks</i>	2 generating sets of 120 KVA; 7 generating sets of 90 KVA; 2 power supplies of 120 KVA; 4 turbine starters; 5 aircraft towing tractors and 21 aircraft towing bars.

SUMU AD 2.9-5 PASSENGER FACILITIES

1	<i>Hotels</i>	In the city
2	<i>Restaurants</i>	H24
3	<i>Transportation</i>	Bus service, taxis and car rental from the AD

4	Medical facilities	Medical Service at the Aerodrome H24 – UCM Tel: 2604 03 29 Ext 1000 (Puerta del Sur Security Control Centre)
5	Bank and Post Office	☛ Exchange and Automated Teller Machine: H24. Post Office: Nil
6	Tourist Office	11:00 to 01:00 UTC
7	Remarks	Nil

SUMU AD 2.9-6 RESCUE AND FIRE FIGHTING SERVICES

1	AD category for fire fighting	CAT 09 3 CFRR OSHKOSH T 3000 vehicles with: 11 356 L of water, 1 590 L of AFFF foam and 250 KG chemical powder each 1 CFRR OSHKOSH TI 3000 vehicle with: 11 356 L of water, 1 514.16 L of AFFF foam and 250 KG chemical powder 1 command vehicle Nissan Frontier twin cabin FWD. 1 Mahindra single cabin FWD vehicle with intervention equipment fast pressure of 100 bar and capacity of 300 Lts of water, 50 Lts of AFFF foam and 50Kg of chemical powder equipment.
2	Rescue equipment	Tools and approach equipment
3	Capability for removal of disabled aircraft	In coordination with the Aerodrome Operator Puerta del Sur S.A.
4	Remarks	From SUMU with FAU aircrafts including FAU rescue personnel and firefighters.

SUMU AD 2.9-7 SEASONAL AVAILABILITY - CLEARING

1	Types of clearing equipment	Mechanical sweeper
---	-----------------------------	--------------------

SUMU AD 2.9-8 APRONS, TAXIWAYS AND CHECK LOCATIONS/POSITIONS DATA

1	Apron surface and strength	Surface: SE apron: concrete and asphaltic concrete. Commercial Apron I: concrete. Commercial Apron II: Concrete. Strength: Commercial Apron II: 82/R/C/X/U and 88/F/C/W/U; SE: 23/F/C/X/T, Commercial Apron I: 82/R/C/X/U
2	Taxiway width, surface and strength	Width: 23 M Surface: asphaltic concrete Strength: TWY A: 88/F/C/W/U. TWY B BTN TWY D and RWY 25: 82/R/C/X/U and 88/F/C/W/U. TWY F: 23/F/C/X/T. TWY C BTN RWY 07-25 and Apron: 88/F/C/W/U. TWY C BTN RWY 07-25 and RWY 01-19: 40/F/C/X/T. TWY D: 82/R/C/X/U. TWY E: 88/F/C/W/U. TWY G: 82/R/C/X/U

3	<i>Altimeter checkpoint location and elevation</i>	E apron 15 M; W apron 15 M.
4	<i>VOR checkpoints</i>	TWY C 344930.67S/0560145.78W (See Ad/Heliport Chart)
5	<i>VOR/INS checkpoints</i>	NIL
6	<i>Remarks</i>	TWY to general aviation PRKG only AVBL for ACFT up to 12500 LB. Taxiway (TWY) C between RWY 07-25 and RWY 01-19 and TWY F, limited to aircraft with code letter "C" up to 36M span / Ex: Boeing 737, Airbus 321.

SUMU AD 2.9-9 SURFACE MOVEMENT GUIDANCE AND CONTROL SYSTEM AND MARKINGS

1	<i>Use of aircraft stand ID signs, TWY guide lines and visual docking/parking guidance system of aircraft stands</i>	Aircraft stands identification signs. TWY centre line signs and nose aircraft stop bar, with aircraft type ID. Visual docking guidance system: Nil
2	<i>RWY and TWY markings and LGT</i>	RWY 07: <u>Markings</u>: pre-THR zone, PERM displaced THR, transverse stripe, THR, RWY designation, RWY centre line, lateral stripe, touchdown zone, aiming point, and 180° turn-over for ACFT up to code letter E. <u>LGT</u>: RWY THR identification, THR, RWY edge, RWY centre line, RWY end and stopway lights. RWY 25: <u>Markings</u>: pre-THR zone, PERM displaced THR, transverse stripe, THR, RWY designation, RWY centre line, lateral stripe, touchdown zone, aiming point. <u>LGT</u>: THR, RWY edge, RWY centre line, touchdown zone and RWY end lights. RWY 19: <u>Markings</u>: pre-THR zone, THR, RWY designation, RWY centre line, lateral stripe, touchdown zone, aiming point, and 180° turn-over for ACFT up to code letter E. <u>LGT</u>: THR, RWY edge, and RWY end lights. RWY 01: <u>Markings</u>: pre-THR zone, THR, RWY designation, RWY centre line, lateral stripe, touchdown zone, aiming point, and 180° turn-over for ACFT up to code letter E. <u>LGT</u>: RWY THR identification, THR, RWY edge, and RWY end lights. TWY: <u>Markings</u>: TWY centre line, lateral, enhanced TWY centre line, mandatory instructions, RWY holding position, intermediate holding position, paved margins, directional signal to the parking stands before entering platform. <u>LGT</u>: TWY centre lights: A, B, C (between Apron and RWY 07/25), E, D and G. TWY edge lights: C (between RWY 07/25 and THR 19) and F

SUMU AD 2.9-20 LOCAL TRAFFIC REGULATIONS

1. Delimitation and Jurisdiction Areas of "General Cesáreo L. Berisso" Carrasco Intl Airport

For the purposes of applying the rules governing the movement of people and vehicles in the "Cesáreo L. Berisso" Carrasco International Airport, it is divided into three areas:

- a) A **public area** comprised by those parts of the airport open to the public and where only in exceptional cases, the Aeronautic Authority may partly or fully limit the use of it.
- b) A **restricted area** comprised by the rest of the civil airport under the jurisdiction of the Aeronautic Authority.
- c) A **military area** comprised by those parts of the airport occupied by Brigada Aérea I and Brigada de Mantenimiento y Abastecimiento and facilities that is under military jurisdiction.

2. Movement of people and vehicles

2.1 We fully implemented AD 1.1-1. The entry and stay of individuals and vehicles in the restricted area is the responsibility of the Policía Aérea Nacional.

a) **Public Area**

People and vehicles access the Public Area of Carrasco International Airport, except when the Aeronautic Authority determines otherwise.

In any Public Area will comply with existing vehicular traffic rules, posted speed limits and parking will be made in specific areas for this purposes.

b) **Restricted Area**

- I) In all cases and without exception the aircraft take precedence over people and land vehicles.
- II) Where necessary the transit of persons in the Restricted Area, these have priority over the terrestrial vehicles.
- III) The maximum speed is 25 KM. per hour except in emergency cases affected with it.
- IV) Drivers of vehicles moving in any Restricted Area Carrasco International Airport must hold suitable driver license for the vehicle they drive and the Entry Permission issued by the competent Aviation Authority.
- V) Drivers must comply with the signalling within the restricted area and are subject at all times comply with the requirements of the Aviation Authority and airport operators.
- VI) Accidents within the Restricted Area must be brought to the attention of the Departamento de Operaciones of Carrasco International Airport immediately after the fact.
- VII) No trains with more than 5 luggage cars or 6 container cars can be towed.
- VIII) The loading and unloading of passengers carried by bus and by the use of fingers. In all cases disembarking take precedence over the boarding.
- IX) Vehicles circulating within the restricted area must have reglamentary lights and headlights right rotary during the 24 hours.

- X) It is prohibited entry into and movement through the taxiways and runways to all vehicles not equipped with a transmitter / receiver with control tower frequency. The responsables of the units must be instructed in the use of such equipment as well as the terms and phrases used in aerodrome control. In case of communications failure responsible for the vehicle shall comply with the control tower signals according to the following:

- Steady **GREEN** light: "authorized to move"
- Steady **RED** light: "stop the march"
- A series of **RED** flashes: "circulate away from the transit zone of Aircraft"
- A series of **WHITE** flashes: "return to the starting point of his vehicle"

It will be an indication of prohibition to enter to taxiways and runways, the lighting of the lights, demarcation of any of the runways, and taxiways.

- XI) It is prohibited the movement of vehicles on the taxiway that connects the Southwest platform with the South platform.

3. Taxiing to and from parking spaces

Any civilian or military aircraft parked and "engines off" that are available to leave this AD, must communicate with "Carrasco Tower" 118.1 MHZ (primary frequency) or 121.8 MHZ (secondary frequency), in order to obtain information from MET conditions, RWY in use, approval of FPL, SID, SSR code and scheduled DLY for engine start, and then communicate with "Carrasco Tower" 118.1 MHZ to receive control, information and alert service. The ACFT operating in platform only receive traffic information available.

CONTROL, COORDINATION AND SUPERVISION OF THE PLATFORM

The control, coordination and supervision of the platforms within the competence of the **Operations Management of the airport operator (Puerta del Sur SA)**. Such jurisdiction is excluded from the control or regulation of movement of aircraft in platforms, which will be governed as provided in Annex 2, Rules of the Air 3.2 Avoidance of collisions - 3.2.2.7 Movement of aircraft on the surface. The provisions of this part, tend to general users can perform the tasks inherent in the operation of aircraft with maximum security for it; it is necessary to strict compliance with the provisions set forth below:

- I) Users should in all cases, ask the Operations Management of the airport operator before the arrival of aircraft, the parking positions to use.
- II) The parking stands are marked according to international standards of autonomous parking of aircraft. Consequently, the ground staff instructions to aircraft will be based on tracking the guide lines for entering, forward rotation and indicator stop signal for the position.
The alterations that for operational reasons could result in changes to the aircraft parking must be authorized in advance by the Operations Management of the airport operator.
- III) The parking stands are intended for embarking and disembarking of passengers, cargo, mail, refuelling, routine tasks and system control parts of the aircraft.
Major maintenance tasks when they have to be done, shall first be coordinated with the Operations Management of the airport operator of the airport operator for the purposes concerned.

- IV) The operator is the responsible of parking stands were clean of oils and fuels and all types of waste that have been dumped during the operation of the aircraft.
- V) Aircrafts during parking, driveways and braking should be accordingly.
- VI) Prohibits the testing of engines in the parking stands.
- VII) Smoking is prohibited on the apron.
- VIII) The assistance of parking and towing of aircraft will be provided by the contractor in office.

Fuel load

- I) The maintenance and refuelling must be arranged by operators of aircraft with the fuel supply companies that provide services or maintenance, as appropriate.
- II) The fuel supply will be always in the position assigned to the aircraft parking.
- III) Refuelling is prohibited of any kind to any aircraft that keep their engines running.
- IV) During the refuelling tasks the supplying company shall place the earth connections, NO SMOKING signs for and have the fire fighting equipment according to International Standards.
- V) The refuelling with passengers on board will be made in accordance with the provisions of LAR 153/154 and Circular C.UY.AGA.002 A of DEC 2013 and in accordance with the provisions of the Operations Manual operating companies.

Responsibility

- I) Activities in the area of the platforms are controlled by the Operations Management of the airport operator and inspected by the competent authority.
- II) The entry and stay in the restricted area of the authorized vehicles will be the responsibility of the Policía Aérea (Air Police).
- III) For the purposes of compliance with section I and II above, the Operations Management of the airport operator and the Policía Aérea (Operations Department and Air Police) complement comptroller closely their tasks.

✈Manoeuvring areas for military and police helicopters

- ✈Areas are established as military and police helicopter manoeuvres in the "Cesáreo L. Berisso" Carrasco
- ✈International Airport the followings:

<i>Area</i>	<i>Location</i>
K	Lateral South of remote point Z, ex-TWY Echo and RWY intersection
L	Lateral North of remote point Z, 100 M North from remote point Z up to RWY 01/19
M	Lateral West TWY Charlie, RWY 01/19 and TWY Foxtrot

See "Helicopter Manoeuvre Areas"

For the above areas of operations, the following transit circuits are designated:

<i>Area</i>	<i>Traffic Circuits</i>
K, L	The traffic pattern will always be made South of remote point Z
M	The traffic pattern will always be made in the West of the runway 01/19

In both cases the height to use will vary between 600 and 1100 FT depending on the type of aircraft and the manoeuvre to be performed. These transits can be shortened to not interfere with the path of the runway 07/25 (on request Air Traffic Controller or Pilot in command) must carry out the exit turn from transit or turn before the basic path of runway 07/25, called this "Short Transit"

See "Helicopter Traffic Circuits"

Military Helicopters (Uruguayan Air Force - Air Squadron No. 5 and Police Helicopters (Ministerio del Interior – National Police Air Squadron)

Air taxi route is established from parking position to remote point Z

Civil Helicopters

Entry and exit from apron already in air or ground taxi will be conducted via taxiway C and / or taxiway A.

HELICOPTER TRAFFIC CIRCUITS

MONTEVIDEO/Intl
Carrasco "Gral.
Cesareo L. Berisso"

4. Procedures for the operation of 747-8 aircraft

4.1 747-8F Landing:

- ✎ Landing on Runway 07: clear at TWY E, then TWY B to TWY D, then back taxi on Runway 25, clear at TWY C to TWY G to Aircraft Stand 12.
- ✎ Landing on Runway 25: 180° turn at runway and then back taxi on Runway 07, clear at TWY C to TWY G to Aircraft Stand 12.

4.2 747-8 (intercontinental) Landing:

- ✎ Landing on Runway 07: clear at TWY E, then TWY B to TWY D, to Aircraft Stand 32 to 35, as assigned.
- ✎ Landing on Runway 25: 180° turn at runway and then back taxi on Runway 07, clear at TWY D to Aircraft Stand 32 to 35, as assigned.

4.3 747-8F Take off:

- ✎ Take off on Runway 07: from Aircraft Stand, follow TWY G to TWY C, then back taxi Runway 25 to runway end, then perform 180° turn for take off.
- ✎ Take off on Runway 25: from Aircraft Stand, follow TWY G to TWY C, then back taxi Runway 07, clear at TWY D to TWY E to TWY B, then hold short of Runway 25 for take off.

4.4 747-8 (intercontinental) Take off:

- ✎ Take off on Runway 07: from Aircraft Stand, follow TWY D, then back taxi Runway 25 to runway end, then perform 180° turn for take off.
- ✎ Take off on Runway 25: from Aircraft Stand, follow TWY D to TWY B, then hold short of Runway 25 for take off.

4.5 Parking:

For 747-8F: Aircraft Stand 12 in Commercial Apron II.

For 747-8 (intercontinental): Aircraft Stands 32 to 35 in Commercial Apron I.

4.6 Remarks:

747-8F aircraft taxiing to/from Aircraft Stand 12 via TWY G will have reduced wingtip clearance of 8.3 M clearance if aircraft are parked on Aircraft Stands 9 to 11. This portion of TWY G is treated as a taxilane. Maintain taxi speed at 12 KT or less.

Airport fillets designed for A340-600.

Follow-me vehicle available con request.

SUMU AD 2.9-21 NOISE ABATEMENT PROCEDURES

Diurnal takeoffs that proceed to fly over the city of Montevideo, shall apply the noise abatement procedures of each aircraft in take-off of all the runways, especially runway 25 and 19.

At night take-offs are not allowed to fly over the city of Montevideo, between 21:00 and 07:00 local time except for emergency, traffic reasons and / or weather.

The direct approach aircrafts flying over the city of Montevideo, shall maintain 3000 FT (900 M) up to 10 NM DME arc, proceeding then to descend to land, except for emergency, reasons of traffic, weather or the aircraft is conducting a published instrument procedures to runway 07.

Restrictions on the landing runway 07.

Both during the instrument approach, as in visual approaches are not allowed to fly below the minimum for runway 07 procedures.

SUMU AD 2.9-22 FLIGHT PROCEDURES

Overview

Flights within the Carrasco TMA will be in accordance with instrument flight rules or visual as appropriate.

Procedures for IFR flights within the TMA CARRASCO:

Approach routes, transit and departure indicated in the charts can be modified at the discretion of ATC. Unless ATC considers necessary other alternative, aircraft flying within a TMA below FL 100 shall maintain an indicated maximum speed of 250 KTS.

Procedures for VFR flights within the TMA CARRASCO:

If permitted traffic conditions, it will be given ATC clearance for VFR flights in the conditions described below:

- a) There will be a FPL to request ATC clearance containing 7 to 18 points and which indicates the purpose of the flight.
- b) ATC clearance shall be obtained immediately before the aircraft enters the area concerned.
- c) Position reports shall be submitted in accordance with paragraphs 3.6.3 of ICAO Annex 2.
- d) Only possible to deviate from an ATC clearance has been obtained when permission.
- e) The flight was conducted with vertical visual reference to ground unless it can be made in accordance with instrument flight rules.
- f) Maintain two-way radio communication in frequency 120.2, 119.2 CARRASCO APP.
- g) The aircraft will be equipped with SSR Mode C transponders

Note: ATC authorization is intended to provide separation between IFR and VFR.

Minimum vertical separation in the Traffic Circuit of Carrasco.

Nil.

Radar procedure within the CARRASCO TMA.

Vector and Sequencing Guide

Aircraft entering the Carrasco TMA shall be sequenced to the corresponding published final approach path to ensure rapid and orderly traffic flow.

✶ The aircraft will be guided directly to the initial approach fix (IAF) or final approach fix (FAF), or as coordinated with the aerodrome control to a point or section of the visual circuit.

Vectors and levels / altitudes of flight will be provided, if necessary, to achieve a spacing between aircrafts to maintain an appropriate interval in the landing, taking into account the characteristics of them.

IFR takeoff minimums

The minimum applicable for takeoff in terms of ceiling and visibility, for aircrafts with two or more engines, shall be the minimum expected for the published instrument approach procedure for the runway in use.

The minimum applicable for takeoff in terms of ceiling, for single-engine aircrafts shall be equal to or greater than that established in the instrument approach charts and the minimum visibility required shall be 1600 M.

On runways with a 1-minute RVR reading, this reading prevails over the value published in the METAR/SPECI.

Reduction of IFR takeoff minimums from runway 07/25 (threshold 25)

Applies only to aircraft with two or more engines:

Minimum RVR visibility 550 M, with the RVR value prevailing over the value published in the METAR/SPECI.

● **Note:** The minimum ceiling value required for takeoff is maintained equal to or greater than that established in the instrument approach charts.

- 1) For takeoff with reduced visibility minima, it is required an alternate aerodrome post-launch in box 18 of Flight Plan Form located within the following distances:
 - a) twin-engine aircraft: alternated one hour of flight at cruising speed with one engine out of service in ISA atmosphere and windless atmospheric conditions.
 - b) three or more aircraft engines: alternated to two hours of flight at cruising speed with all engines running, in ISA atmosphere and windless atmospheric conditions.

Note 1: Indicate the alternate aerodrome post-launch as follows:
RMK / DEP ALTN (4 letters Aerodrome location indicator)

Note 2: Fill in the forms of Repetitive Flight Plan in the box Q "Remarks"

- 2) MET conditions for the alternate aerodrome post-launch.
The alternate aerodrome post-launch shall at least be operational for IFR landings at the time of takeoff and forecasts indicate that conditions will be at or above minimum values using the aerodrome at the expected time of landing.
- 3) IFR minimum flight level
The aircraft must be able to climb with one engine inoperative until the IFR flight level appropriate to proceed to the alternate aerodrome post-takeoff or destination aerodrome.

IFR landing minimums

The minimum necessary for landing in terms of ceiling and visibility, shall be the minimum for the instrumental approach procedure published for the runway in use.

Holding procedures, approach, and departure

Holding procedures and approach that is published are based on standards set in the latest edition of DOC.8168-OPS/611 (PANS / OPS) of ICAO "Procedures for Air Navigation Services, Aircraft Operations."

Arriving flights

✈ IFR flights entering a TMA to land shall be routed to the corresponding published final approach path and those indicated by the respective control according to the conditions in the area.

Departing flights

✈ IFR flights departing from controlled aerodromes shall receive an initial permission from the ATC of the Aerodrome Service (TWR or AFIS); the limit of such permission shall normally be the destination aerodrome.

✈ After takeoff, the turns and paths that the aircraft shall follow, as well as the levels that they must maintain before reaching the assigned cruising level, shall be those indicated in the air traffic control permit.

Holding procedure

Holding procedures are indicated in each case in the instrument approach charts.

If for some reason had to do a holding procedure at one point for has not been published any, it will be make a normal holding procedure, forming a hippodrome-type circuit, according to the procedure recommended in Doc 8168-OPS / 611, VOL I, Part IV of ICAO

The aircrafts shall enter holding patterns at speeds equal to or less than the following.

See ENR 1.5-2

Communications Failure

In case of communication failure, the pilot shall act in accordance with LAR 91, 91.265 (b) and LAR 211, 211 6.3.2.

SUMU AD 2.9-23 ADDITIONAL INFORMATION

Procedure for Domestic Flights

The crew must complete the Sworn Statement of Domestic Flights (2 copies), which may be obtained at the website of the Carrasco Intl Airport (www.aeropuertodecarrasco.com.uy), at the Operations Offices of rest airports of the country or at the Custom Office of the Arrivals Hall.

From the aircraft parked on the apron it shall move the occupants of it to the doors of the Arrivals Hall of the Terminal.

If it is required, it must be submitted the Sworn Statement of Domestic Flights to the Migration authority, indicating that it is a domestic arrival.

The occupants of the aircraft must direct towards the Customs checkpoint, but are unable to make purchases at the Duty Free Shop.

It shall submit a copy of the Sworn Statement of Domestic Flights (copy 1) in a position of Customs, indicating that it is a domestic arrival. Sanitary Barrier staff performs the appropriate actions if they required.

The crew must submit a copy of the Sworn Statement of Domestic Flights (copy 2) in the Office of Airport Flight Plan.

☛ Attractive areas and presence of birds in the vicinity of the airport

☛ Caution is advised in aircraft operations in the sector located southwest of Carrasco International Airport, 3.8 NM (6.1 KM) from the VOR / DME "CRR" (34°49'57.8"S 056°01'30.5"W) RDL 252, due to the presence of birds, in particular gulls (*Larus dominicanus*) due to the existence of a final waste disposal plant (34°51'05"S 056°05'29"W). The movements of the seagulls between the coast and the mentioned final waste disposal plant are carried out, mainly during the first three hours after sunrise and two hours before sunset. The route followed by the birds to and from the plant comprises a corridor of variable width. The flights of these birds are at low altitude, varying according to atmospheric conditions.

☛ In addition, other land uses are recognized as relevant and attractive for fauna were identified in their environment as potential feeding, roosting and / or refuge sites, mainly for birds, as they are the major sources of conflict with airport operations. These land uses are: wetlands, crops and water bodies (see Bird Concentrations).

☛ Presence of birds at the airport

☛ Generally, due to the occurrence of rains, the presence of marine and coastal birds such as: terns (*Sternidae*), kelp gulls (*Larus dominicanus*), brown-hooded gull (*Larus maculipennis*) is found in the airport property.

🔑 Study about birds

🔑 According to information from the Carrasco Airport Bird and Fauna Control staff, 205 species were recorded in the vicinity of the airport property.

🔑 Four categories are established in Advisory Circular CA-AGA-153-006 that group the registered birds according to their body mass:

- Category 0: body mass between 0 and 249 grams, represented by 144 species
- Category 1: body mass between 250 and 749 grams, represented by 35 species
- Category 2: body mass between 750 and 1499 grams, represented by 17 species: roseate spoonbill, red-headed raven, caravan, biguá, carao, great coot, lobster harrier, kelp gull, white-tailed eagle, great white heron, martineta, mixed hawk, red heron, witch heron, red eagle, peregrine falcon, cinnamon duck.
- Category 3, body mass of more than 1,500 grams, represented by 9 species: black-necked swan, chaja, coscoroba, common stork, black heron, creole duck (domesticated), black eagle, yellow bandurria, black bandurria.

🔑 Among the species registered at the airport, those with category 2 and 3 stand out due to their relevance and potential risk.

🔑 According to the impact registration statistics, the following species stand out:

- Tero (*Vanellus chilensis*).
- Kelp gull (*Larus dominicanus*)
- Pigeons (Genus *Columba* and *Patagioenas*)
- Carancho (*Caracara plancus*)
- Common falcon (*Falco sparverius*)

Bird and Wildlife Control Program

🔑 The prevention and dispersion methods used to mitigate the risk of impacts or ingestions are based on the use of biological control with falconry techniques, dispersal with harassing dogs, pyrotechnic launching system, placement of traps for mammals, the routes movement area and biological studies.

Service coverage

From 10:00 to 22:00 UTC by the Bird and Wildlife Control company.

🔑 From 22:00 to 10:00 UTC by the Operations & Experience Management of the Airport Operator.

🔑 Ibis bird strike notification

🔑 Whenever events related to Impacts or intakes of Fauna occur with the aircraft, it must be delivered; one copy of the IBIS report to the Office of Commercial Air Transport Inspectors at Carrasco International Airport and another to the Operations & Experience Management of the Airport Operator.

Special taxiing operations for category "E" or higher aircraft.

☛ It is established as runway holding position for threshold 07 the one located over taxiway "A" prior to the crossing to runway 01-19, for category "E" or higher aircrafts.

MARKING AIDS RWY 07/25 AND EXIT TWY

This diagram illustrates the layout of Runway 07/25 and its intersections with various taxiways. The runway is shown as a horizontal strip with a centerline and edge lines. Taxiways intersect the runway at several points, with some having holding positions. Marking aids, including arrows and symbols, are shown on the taxiways to indicate the correct path for aircraft. The diagram is a technical drawing used for flight planning and navigation.

**INTENTIONALLY
LEFT BLANK**

Map of the Montevideo area showing land use and water bodies. The map includes a 13 km radius circle centered on the city. Land use categories are color-coded: CROP (green), WETLAND (yellow), LAKES, RESERVOIR, and CUTWATER (blue), and WASTE PLANT (purple). A scale bar shows distances in KM (0-8) and NM (0-4). A north arrow indicates the direction of the VAR 12° N 2025. The map is bounded by coordinates 56°10' to 55°50' longitude and 34°00' to 35°00' latitude.
